

Artek, Inc.

Fort Wayne, Indiana, USA

Artek to celebrate its 25th anniversary in 2010

Artek, a leading manufacturer of Duravar® extruded Ultra-High Molecular Weight Polyethylene (UHMW-PE), has been providing dependable quality, reliable support and faithful service to their plastics partners for 24 years. Artek has been rewarded with solid business partnerships over the years and looks forward to growing those partnerships and creating many new ones in the years to come. Artek puts great value on these partnerships and cannot thank each of them enough for their loyal support and patronage.

Artek is continually striving to provide unsurpassed customer service, premium material quality, comprehensive technical support and competitive pricing to their partners in plastics. Artek specializes in producing Duravar® UHMW-PE extruded products specifically designed to improve application performance and minimize maintenance costs in a multitude of industries. Artek is continually expanding its capabilities to provide a

full line of high-performance Duravar UHMW-PE products, including rod stock, full sheet, half sheet, quarter sheet, flat bar and profile shapes.

All Duravar UHMW-PE products are available in a variety of FDA colors and enhanced formulations to improve application performance. This full family of Duravar UHMW-PE extruded products allows Artek the opportunity to continue to grow with their customers by providing a one-stop-source for high performance Duravar UHMW-PE products.

As a member of the elite engineered polymer family, Duravar UHMW-PE products provide the combined enhanced physical properties of high abrasion resistance, low coefficient of friction and excellent impact resistance to eliminate the traditional problems incurred in many industrial applications on a daily basis.

These excellent physical properties and the technical expertise provided by the Artek staff make Duravar UHMW-PE the

desired material of choice to solve today's industrial application problems. Artek's technical and customer service staff is just a phone call away and are always ready to assist you in recommending the perfect Duravar UHMW-PE material for those challenging applications.

At Artek, the customer is always the No. 1 priority, and is treated with specialized, individual customer service and support. The Artek Team is dedicated, experienced and recognize the value of quality products with quick turnaround times. They believe in building true, long lasting partnerships and team synergy with each customer.

If you enjoy being associated with a winning organization that thrives on providing true customer support and service, call Artek today and become a part of Artek's Team of valued customers.
