

Boltaron Performance Products, LLC

Newcomerstown, Ohio, USA

A leader in high performance plastics for demanding applications

Boltaron is a leader in high performance plastics for demanding applications. No other film and sheet producer in the USA offers calendering, extrusion and press laminating under one roof. Each of these processes produces a range of film and sheet products having distinct qualities.

Specialized grades

Over 50 specialized grades offer a combination of fire ratings, performance, colors, textures and gauges unavailable from any other film and sheet producer:

- PVC, PVC/acrylic alloy and CPVC film and sheet, extruded, calendered and press-laminated in gauges from .003 to 3.0 in. (.076 to 76.2 mm)
- FAR 25.853 (a) and (d), MVSS Docket 90 and 90A, UL 94 V-0 and 5V, Class 1-A and ASTM E-84 fire ratings
- Clear, white and unlimited integral colors with low minimums
- Scratch-resistant metallics in unlimited colors with low minimums
- 16 standard surface textures and custom textures with low minimums

- Impact resistance to 20 ft-lbs/in (1059 J/m)
- Extreme formability with uniform wall thickness

Specialized film and sheet products

Boltaron offers specialized PVC, PVC-alloy and CPVC film and sheet products for thermoforming, fabricating and printing applications:

- **Aircraft Interior Components** — FAR 25.853 (a) and (d) fire rated film and sheet products of PVC alloys in gauges from .018 to 3.0 in. (.046 to 76.2 mm) offer unequalled impact resistance, extreme formability, 10 textures and unlimited colors, including the industry's only FAR 25.853 (d) rated integral metallics, providing unmatched brilliance and scratch resistance.
- **Rail/mass transit vehicle interior components** — specialized PVC alloy film and sheet grades for rail/mass transit interiors offer MVSS, Docket 90, Docket 90A and ASTM E84 ratings along with high impact, low smoke, low heat release, high

tensile and chemical resistant characteristics, and unlimited colors including scratch-resistant metallics.

• **Commercial/industrial components** — a broad range of PVC, PVC-alloy and CPVC film and sheet products in fire rated, ultra-high impact, corrosion-resistant and economy grades in gauges from .018 to 3.0 in. (.046 to 76.2 mm), 10 standard textures and unlimited solid and integral metallic colors for thermoforming and fabricating of a variety of parts and products.

• **Printed credit/debit/security cards, signage, P-O-P** — high-durability, scratch-resistant and economy film and sheet products in gauges from .005 to .030 in. (0.13 to 0.76 mm) in rigid white, clear, translucent and custom colors for high quality printing and embossing of secure and non-secure cards, interior and exterior signage and reverse-printed laminations.

The superiority you need to win film and sheet sales at formers and fabricators of aircraft, mass transit, clean room, and commercial products

- PVC, PVC/Acrylic alloy and CPVC film and sheet, extruded, calendered and press-laminated in gauges from .003 to 3.0 in. (.076 to 76.2 mm)
- FAR 25.853 (a) and (d), MVSS Docket 90 and 90A, UL 94 V-0 and 5V, Class 1-A and ASTM E-84 fire ratings
- Clear, and unlimited integral colors with low minimums
- Scratch-resistant metallics in unlimited colors with low minimums
- 16 Standard surface textures, and custom textures with low minimums

- Impact resistance to 20 ft-lbs/in (1059 J/m)
- Extreme formability with uniform wall thickness

Nowhere else will you find this unique combination of desirable selling features—or a supplier that is more distributor-friendly.

Swing film and sheet business your way, at high margins, by offering the ultimate in selection and performance—only from Boltaron.
