

Global EPP Ltd.

Leicester, United Kingdom

Innovation, quality and technical excellence

Global EPP is a leading, UK-based manufacturer of engineering plastic stock shapes with many decades of experience. Since 2008 we have been distributing our products from our U.S. warehouse and are pleased to announce that we have now become a member of the IAPD. We offer a wide range of profiles, grades, colors and sizes in high quality cast nylon, acetal and extruded nylons.

Wide range of cast nylons

Through our recently upgraded and expanded casting facility we can offer the full range of standard stock shapes and have the ability to custom cast and custom formulate grades and colors for particular applications. The modified cast polyamides include various lubricated and copolymer grades as well as FDA compliant materials. Our imperial product range includes 10 ft. x 4 ft. sheets, 10-foot rods and the widest range of tubes in the industry.

High quality extruded products

Over the past years GEPP has invested in one of the most modern extrusion capacities. Our integrated facility allows us to manufacture a large range of extruded products and profiles on customer demand. The standard stock range of imperial size products we offer include 10 ft. x 4 ft. sheets and 10-foot rods.

To ensure our product quality, Global EPP concentrates on the various issues relating to raw material supply and production processes. Our desire is to be a low cost, high quality producer with a universal set of standards across all our manufacturing and distribution facilities.

U.S. warehouse and expert sales staff

We understand that reliable stock availability is vital in this industry. GEPP services the U.S. market from its distribution base in Ambridge, PA, USA, where we hold significant stocks of both cast nylon and acetal copolymer in sheets and rods for immediate dispatch.

All Global EPP personnel are trained to provide sensible, technical advice. Our engineering expertise is focused on providing quality products and technical solutions in order to answer the industries many and varied requirements. Highly qualified sales engineers are on hand to guide you in all aspects of material selection and component design. In North America, **Larry Miller** manages our growing stock shape distribution facility. He is well regarded for his knowledge and commitment to customer satisfaction.

Our full product range details are published in our stock shapes delivery programs. Our aim is to have what you need, when you need it. Try us!
