

NOVUS Plastic Polish

Savage, Minnesota, USA

Home of the industry leader in acrylic polishing

NOVUS Plastic Polish has been the leader in manufacturing quality plastic cleaners and polishes for over 30 years. Since 1973, our plastic polishes have been the industry leader for the care and maintenance of acrylics, polycarbonates and plastic materials. Based in Savage, MN, USA, NOVUS has helped millions of customers win the war against fading, scratching and dulling of plastics that often cause quality products to look old and worn before their time.

In the home or in manufacturing, NOVUS is the answer to scratch removal for all plastic, acrylic and fiberglass products. NOVUS has formulated a complete system to restore scratched, faded or discolored materials and has been used and recommended for three decades. Our three polishes have many qualities.

Plastic Polish #1

Plastic Polish #1 is a cleaner, shiner and protector for all plastic surfaces. In one easy application this highly concentrated formula polishes plastics to an even, lus-

trous finish. This product leaves behind a finish that resists finger marks and dust buildup, while providing antistatic and antifogging properties.

Plastic Polish #2

Plastic Polish #2 removes light scratches and haziness from most plastics. This product doesn't just cover the damage but polishes the surface to restore and protect the original luster of the plastic. By following up #2 polishing with an application of our #1 polish, results are improved with added shine and protection.

Plastic Polish #3

Plastic Polish #3 removes heavy scratches and prepares surfaces for #2 polishing. After years of intensive research and development, this product will remove damage that no other product on the market will touch. Novus Plastic Polish #3 can be applied by hand or with a mechanical buffer, allowing for rapid restoration of most plastics.

Novus Plastic Polishes are used to re-

store and refresh products such as acrylic storm windows and doors, convertible automobile windows, aircraft and boat windows, motorcycle windscreens, acrylic aquariums, CDs/DVDs, lacquer finishes and acrylic furniture as well as countless other plastic surfaces.

Plastic products have grown tremendously the last 30 years. Yet, as widely used as plastic is, many people are still not sure how to care for it. NOVUS Polishes can assist you. By using a few simple techniques, along with NOVUS Polish #1, #2 and #3, you can actually add life to plastics. Best of all, you don't have to be a professional to get quality results.

Our customer support staff is ready to assist you with all your plastic polish needs. For more information, check out our web site at www.novuspolish.com or call our toll-free number (800-548-6872).
