

# Plaskolite, Inc.

Columbus, Ohio, USA

The largest privately owned U.S. manufacturer of continuously processed acrylic sheet

**F**ounded in 1950 in Columbus, OH, USA, by the Dunn Family, Plaskolite, Inc. is proud to be the largest privately owned U.S. manufacturer of continuously processed acrylic sheet. With the June 2006 acquisition of Bunker Plastics, and most recently, the Optiglass coating division (October 2009), Plaskolite, Inc.'s reputation of unparalleled service, quality, stability and integrity in the manufacturing

of acrylic sheet is being carried over and expanded into its diverse line of high-performance coatings. The July 2007 acquisition of the continuously processed acrylic sheet division of Lucite International enhanced Plaskolite's ability to provide better service, by increasing its manufacturing capacity, and providing opportunities to better meet the product needs of its customers. These acquisi-

tions show Plaskolite's continuing effort to provide a variety of superior products, services, and to further strengthen its position as a leader in the marketplace.

## Product offerings

Plaskolite's product portfolio includes:

- OPTIX® acrylic in flat sheet and roll stock
- OPTIX® Frost and patterned acrylic sheet
- OPTIX® LD light diffusing acrylic sheet
- DURAPLEX® impact-modified acrylic in flat sheet and roll stock
- FABBACK® acrylic mirror sheet in clear, colors and textures
- MUSTANG® Copolyester in flat sheet and roll stock
- PETG and polycarbonate mirror
- First surface, see-thru and marine grade acrylic mirror sheet
- Polystyrene sheet
- Non-glare acrylic and polystyrene sheet
- Lighting panels
- Coatings

## Specialty items

- OPTIX® DA Digital Acrylic provides optimal adhesion of UV curing inks without needing the application of an adhesion promoter during the pre-press process. OPTIX DA allows for high-quality, vibrantly colored prints without sacrificing the outstanding optical clarity offered by acrylic sheet.
- OPTIX® LD light diffusing acrylic sheet is offered in a wide variety of stock sizes and Run-to-Size. Its superior diffusion properties allow for greater sign design flexibility and slim profile channel (CAN) letters. Available in the most popular sign market colors with custom corporate color matching available.

## Plaskolite-Bunker's diverse line of high performance coatings

- Abrasion resistant optical quality
- Acrylic coatings
- Anti-fog mirror coatings
- Anti-fog optical quality polycarbonate coatings
- Hard coat anti-fog optical quality coating
- Formable acrylic hard coatings
- Formable hard coat optical quality
- Polycarbonate coatings
- Impact modified UV cure hard coat
