

Polygal® Inc.

Charlotte, North Carolina, USA

Polycarbonate and polypropylene structured sheets and advanced glazing systems

Polygal Plastics Industries Ltd. is a world-leader in the design, manufacture and marketing of polycarbonate and polypropylene structured sheets and advanced glazing systems used in a large range of applications including agriculture, private and public architecture, consumer products and DIY. Valued for their outstanding light transmission, strength, durability, energy-savings, ease of installation and overall high quality, Polygal products provide optimal, cost-effective solutions for skylights, solarium structures, greenhouses, illuminated signs, industrial packaging and many more applications.

Polygal has earned an industry-wide reputation for uncompromising quality and innovation and is certified for the International Standards Organization ISO 9001:2000 and ISO 14001, as well as other international engineering standards such as CSTB (France), BBA (United Kingdom), B1 (Germany) and others. With in-house technical support and product development departments, Polygal is dedicated to customer satisfaction and maintaining the company's competitive edge.

The original manufacturing site was established at Ramat Hashofet, Israel, in 1973, and produces polycarbonate and polypropylene products for all major world markets. In addition, Polygal has a marketing subsidiary in the United States with a warehouse in Charlotte, NC, and is a partner in a PC manufacturing joint venture in China.

Since its founding in 1973, Polygal has maintained a commitment to quality, customer service and environmental protection. For Polygal, top product quality is an important strategic advantage. Attention to detail is invested at every stage — from selection of the highest quality raw materials to inspection of finished products before delivery to ensure full customer satisfaction.

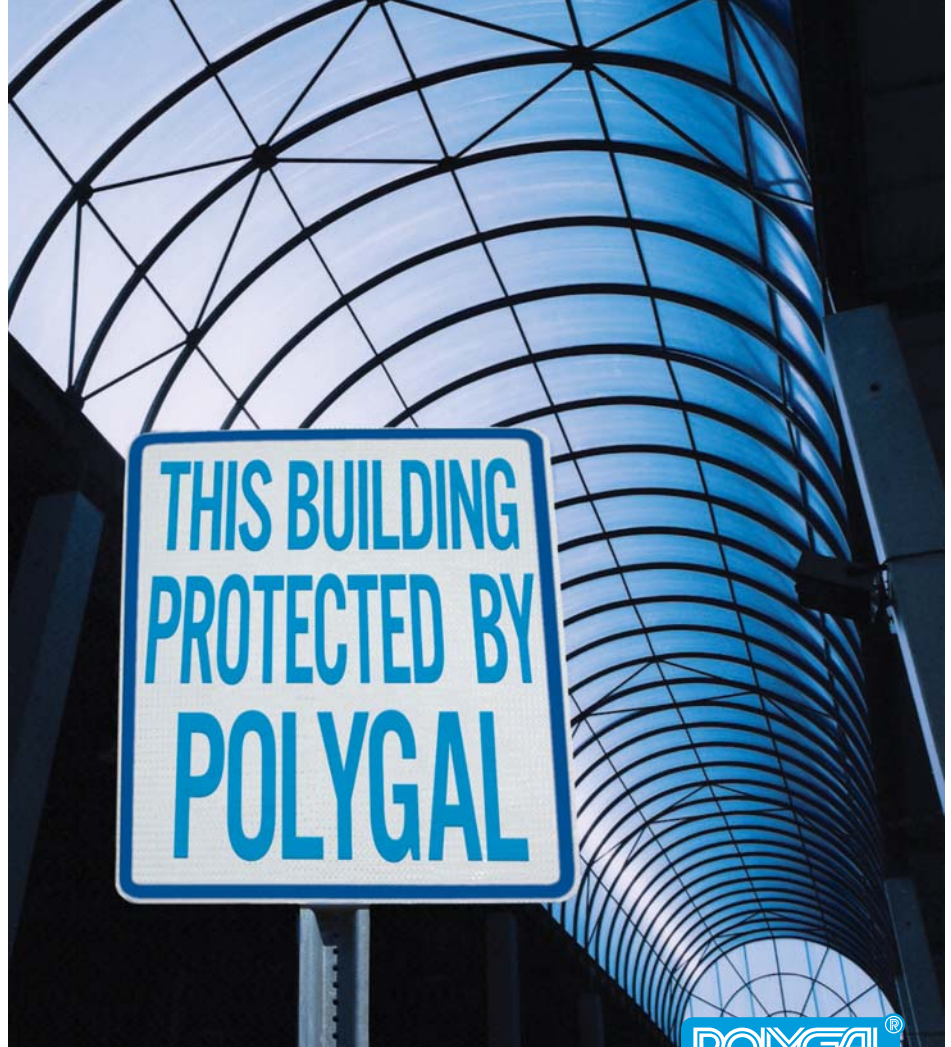

Polygal's marketing department, through its regional sales managers, handles sales and customer support in over 60 countries around the world. The export department's professional staff ensures expedient delivery of shipments.

Its expertise in polycarbonate applications is matched by a deep understanding of the needs of the architectural and agricultural sectors. Polygal has developed a wide range of innovative products, and confirmed its position as an innovator in the polycarbonate sheeting industry.

Its concern over environmental issues is reflected in the design of its energy saving products, as well as its own operational procedures. In 1998, Polygal adopted the ISO 14001 Environmental Management guidelines to ensure systematic application of sound environmental practices.

With over 30 years of expertise in polycarbonate structured sheets, Polygal offers many important advantages to those who use its products.
